

ENGINEERING TECHNOLOGY FORUM
With the
Florida Engineering Technology Leadership Council
October 17-18, 2019
Hosted by
Seminole State College – Oviedo Campus

Good Morning everyone and hope that your summer has gone well for you.

Seminole State College will be hosting the Fall Engineering Technology Forum October 17-18, 2019 at their Oviedo Campus. This will be our second visit to the college with the first being in 1997 that officially began the Engineering Technology Forums.

I have attached the first Agenda and the Hotel information so that you can complete your travel plans.

Sam and I will be working on the more detailed agenda and I will send that out later. If you have additional items or topics to be included, please let us know.

I will also be contacting the Vendors for their participation on a separate email.

Thank you for your support and I look forward to seeing you at Seminole State College.

We will be using EventBrite again for registration and Danielly will be the contact person. Her email is dorozco2@hccfl.edu. I will send out that information a little later for the registration.

I hope you all have a good week.

Brad
